**DETAILED ACTION**

***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-8, drawn to isolated human soluble gluanylyl  $\alpha$  1/ $\beta$  1 polypeptide and method of making such polypeptide.

Group II, claims 9-12, drawn to use of polynucleotides encoding human soluble gluanylyl  $\alpha$  1/ $\beta$  1 polypeptide for somatic gene therapy.

Group III, claim(s) 13, drawn to antibodies.

The inventions are distinct, each from the other because of the following reasons:

1. Group I is a product and a process of use; these share the special technical feature of the enzyme molecules, which groups II-III do not share.
2. Group II is a process; this shares the special technical feature of the use of polynucleotides for genetic therapy, which groups I and III do not share.
3. Group III is a product; this shares the special technical feature of an antibody, which groups I and II do not share.

Therefore, the claims are not so linked by a special technical feature within the meaning of PCT Rule 13.2 so as to form a single inventive concept.

Art Unit: 1652

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Pursuant to 37 C.F.R. 1.475(d), the ISA/US considers that where multiple products and processes are claimed, the main invention shall consist of the first invention of the category first mentioned in the claims and the first recited invention of each of the other categories related thereto. Accordingly, the main invention (Group I) comprises the first recited product, a enzyme polypeptide and method of making the same. Further, pursuant to 37 C.F. R. 1.475(d), the ISA/US considers that any feature which the subsequently recited products and methods share with the main invention does not constitute a special technical feature within the meaning of PCT Rule 13.2 and that each of such products and methods accordingly defines a separate invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
